* In March and April we began to have issues that had not occurred prior. We found that the software company had sold their product and the new company was struggling also. However, working with them, we found that our Gmail sign in was conflicting with our sign in,so we created a different Gmail sign in and found the streaming connection more reliable. ** YouTube also is a problem when the stream operator (on our side) forgets to set the stream to be "public" prior to starting the stream.

We can use more help on the video side and the streaming side as well. If any one is interested in helping or finding out more, please do not hesitate to contact me. My thanks go out to Mary Johnson, Melanie Geurtsen, Vicki and Jim Wilson, Rich Connell and Rachel Gregg for their help in 2024.
